APPLICATION & FEE TO:
Ms Ros Wyllie
Pain Management Research Institute
Level 10C, Royal North Shore Hospital
St. Leonards, NSW 2065 Australia

About the Institute

The Pain Management Research Institute consists of a multidisciplinary group of health professionals and research staff who are collaborating in education and research to improve pain treatment in adults and children. The staff include:

- Medical specialists in pain medicine, psychiatry, rheumatology, palliative care
- Registered nurses;
- Clinical psychologists;
- Allied health professionals such as physiotherapists and occupational therapists;
- Basic and applied scientists.

Clinical treatment, teaching and research activities extend from acute pain (e.g. post operative and trauma) to chronic non cancer pain (e.g. low back pain, post amputation pain, herpes) and cancer pain management.

The Institute facilitates an articulated online Masters program in Pain Management, in association with The University of Sydney. Individuals can access single units of study from this program for continuing education purposes.

**Pain Management
Research Institute**

Short Course Outline

This two week (8 days) short course is based on the IASP core curriculum and facilitated by leading specialists in the field of pain management. It is designed for professionals with an interest in learning about current views and approaches to the assessment and management of pain.

Week 1: The Problem of Pain

The first week introduces participants to the extent of the problem and explores pain contributors and assessment.

Topic areas include:

- Biopsychosocial aspects of pain
- Neurobiology related to mechanisms of pain
- Pharmacology
- Psychology: assessment
- Research design: clinical trials: epidemiology
- Acute pain assessment
- Case presentations

Week 2: The Management of Pain

In the second week participants explore current principles of pain management.

Topic areas include:

- Ethics and legal issues
- Musculoskeletal pain
- Pain in Children
- Pain in the Elderly
- Psychology: intervention
- Cancer pain
- Neuropathic pain
- Chronic pain: multidisciplinary management
- Case presentations

For students enrolled in the Graduate Certificate, Graduate Diploma or Masters, please note that Week 1 essentially covers Semester 1 content and Week 2 covers semester 2 content of the first year of the program.
